

the whole existence is becoming vaster and vaster
the whole existence is moving towards light
everything...
even the rocks...
everything is expanding
life is not shrinking...remember...
life is expanding
the ultimate state of expansion is the truth

you can see it and know it
even if you do not see it and do not know it
the truth is still present
you are not present...that is the difference
but the truth is already present for this whole humanity
it has always been silently present
taking care of this whole universe
when you will understand that is a different matter
you will have great compassion in your heart
beautiful...

question *what do you think about the armageddon...the collapse of the world ?*

it never happens
unconsciousness and consciousness
there is no armageddon
unconsciousness is armageddon and it already happened
you cannot kill life
forms may change...maybe...
but you cannot be killed
understand what i am saying
even if armageddon...
you cannot be scratched

but there will be no armageddon
love is too strong
the force of life
the whole power of life is too overwhelming
the power of hate...blindness...is just a little darkness...
life struggles for life

we are coming close to a certain point
the time for armageddon...the dark age...
where things are becoming so materialistic
but the whole world is slowly shifting
towards love...compassion and life
the more dangerous it gets
this whole existence starts trembling
and pulling you back slowly slowly to life

life is overwhelmingly powerful
i say it will never happen
but it is good to think it may happen
it makes you a little alert
it is always good to think there is no tomorrow
it is always good to be a little bit alert
so you do not take life for granted
you do not postpone your inner journey

if you knew that you have only six more months to live
after that armageddon
the world will come to an end
what are you going to do ?
you will start quickly meditating...finding the way out...
yes...maybe armageddon might happen
anything that helps you on the way
but i cannot foresee any future of this nature
nothing...
you can breathe now
