

mind...nomind...  
supermind is one who has created a fusion between mind and nomind  
that is supermind...  
do you understand ?  
mind alone is a madness...just a common man...  
nomind alone is a meher baba...a sai baba...a ramana...a mystic...  
combining mind with nomind...  
allowing them to merge...settle and become familiar with one another  
and you have created supermind...the enlightened mind...

hence buddhist masters say  
that this mind can be enlightened  
and they also say that this mind cannot be enlightened  
the mind that can be enlightened is the supermind...  
you need some time...some patience after enlightenment  
to allow this fusion to happen naturally

i am blessed because i am guided by my master  
i reached the state of nomind...  
my body was not ready...  
and my master has been gently working on me...day and night...  
with his compassion and he creating me slowly slowly  
i am watching his miracle  
of how he is bringing this nomind experience to this little body of mine

and remember again...  
you have been listening to the greatest master osho  
who has been speaking for twenty years  
i have just started speaking not even two years  
so let us wait and see what happens with me twenty years hence  
in these three years i have moved ahead  
because i have him as my master...guiding me...  
protecting me...sheltering me under his wings  
i am the creation of the greatest master osho  
and again and again i tell people...just give me time...be patient...

i am patient  
but they are impatient to judge me  
and it is to their peril  
to me it does not matter at all  
i only have compassion for these people...  
who are in a hurry and haste to judge me  
because if they do not understand this fusion  
that is happening around me now  
they will miss something important for their own future...  
not to understand what is happening to me...  
is to miss their future potential

if you are watching carefully  
you can see what is coming along the way  
and you are also creating me...  
wherever i go i thank the people  
who are willing to listen to me  
because you are inspiring me to speak  
on my own i am not going to speak to the walls  
i am not going to tell the walls  
which is the way back home  
i am mad...but not that mad !  
i do not speak to myself

sitting with you  
you are giving me the opportunity  
and you are creating me also...  
that is why i am always grateful to people...  
thank you for coming and listening to my rubbish  
and maybe slowly slowly  
it will become more intelligent  
as i will continuously grow deeper and deeper  
hmm ?
