

the inner journey is so simple !
i do not understand why people cannot understand it
it is as easy as this
very simple !
i say it again because today many people missed dancing with me
whenever i see people sitting and not dancing that evening
i feel sad for them that they are missing something

to experience the peak with a mystic
you have to dance with that person
when you dance with that person
and you are lost in the dance
something like a flame simply jumps on you
we are like one ocean
if the ocean goes higher and higher and higher
you can simply float on top and bring it down
you can lift each other higher and higher in the dance
and each one gathered here can feel the same orgasmic height
that is why we sit together in one buddhafield of energy

we can raise that one pool of energy higher and higher
it is not an isolated experience
when you disappear you merge with me
when i disappear i merge with you
merging together there are no people here left anymore
just a heightened state of oceanic energy

if one person knows the secret...
he is alert and aware and watchful...
that transforms the whole experience
you just need one person to know the secret
how this stillness peaks everybody together
the energy rising higher and higher
when few people are sitting...
they are not lifting the whole space like one fabric

you meet a mystic
this is what you have come here for
i can give you words...a hundred thousand words every day...no problem
if you cannot go home drunk with the experience of some blissfulness
then all you have learnt is rubbish
you just filled your head with some nonsense
and you go home more depressed and more confused

i am dancing with you
when i am dancing...dance totally please !
i am with you all...i am total !
i am floating higher...higher...higher...higher...higher...
sometimes going so high you miss the whole point
i need you as much as anyone else
i depend on you too
i am not isolated from you people
please understand the experiment
do not sit...you will become dead
explode into totality and you will understand

especially some young people sitting here
i can imagine a sixty five year old...no juice...just sitting
young people sitting ? my god !
i am fifty and i am still dancing like the wind...
this is the only way i know how to transfer the experience easily
that you can have a sudden glimpse of it
and you can carry home a certain experience

you may not know it there and then
but something will filter in you
and one day when you are just walking by the river
just vacant...empty...for no reason...
suddenly it will be there because you are absent
and that energy is so powerful and gripping
it will catch you unaware
