

if nothing happens it does not matter  
you enjoy a moment of madness  
but at least you did it !  
you had the courage...  
you leaped into the flame  
burn and see if you are consumed or you are still present  
at least you will pass through the fire  
something is bound to transmutate within you  
you can never be the same  
never !!

**questioner** *you said you could not be the same person after sannyas  
in any way ? the person would not be the same without sannyas ?*

impossible ?  
it never happened !  
you have to jump and do not make logic out of it...why it happened  
you know the body...you know the mind...  
but you do not know death  
if you know death you do not need sannyas  
just knowing that death does not exist you know your eternity  
then you are sannyas itself...  
the deathless in you...that which will remain is sannyas

if you know death  
you will laugh...there is no death  
knowing that you are deathless  
knowing that nothing can kill you  
it is the truth  
let us look at the truth...  
omnipotent...omnipresent...omniscient  
all powerful !  
it is so powerful

what is the power of truth ?  
it is invisible...no taste...no touch...no sound...no smell...  
it is present everywhere...  
it knows all...  
look at the qualities of truth...  
something is present everywhere and yet it is invisible

how are we seeing objects ?  
all we need is light  
light falls onto some something and you will see the object  
just remove the lights...remove the sun...remove the moon...  
remove all sources of light...  
and you will see no objects anymore  
how will the object appear  
when there is no light to show you the object ?

leaving things in the absolute void of darkness...  
that which is material will start to disintegrate  
it will start falling apart because light is needed to create its reality  
light is matter...a certain vibration of matter that creates light  
light touching any object shows you the object  
shows you that within the object is hidden the subjectivity  
something invisible in the visible

it is present everywhere but it is invisible  
nothing can destroy it...nothing can create it...  
if you can create something...  
certainly you can destroy it  
and the creator needs to be there to create it in the first place  
who made the creator ?  
something has been present in the existence before  
and was always there before  
if you see creation to be material  
then you have not understood the source of creation
